

Research Fellow in Computer Science

Middlesex University

Location:	Hendon	Placed on:	6th July 2016
Salary:	£35,786 to £41,108 (including Outer London Weighting)	Closes:	4th August 2016
Hours:	Full Time	Job Ref:	SCT153
Contract Type:	Contract / Temporary		

The Department of Computer Science at Middlesex University London is offering a research fellow (postdoctoral) position in the areas of parameterized complexity and computational geometry.

The position is within the Foundations of Computing group, (<http://www.cs.mdx.ac.uk/foundations/>) and is funded by an EPSRC project on ‘Fixed-parameter tractability and lower bounds for geometric optimization problems’.

The successful candidate must have a PhD in computer science or mathematics. Preferably, he/she should have expertise in one of the fields of parameterized complexity or computational geometry and a genuine interest in the other. Strong candidates in other areas of algorithms research (e.g., approximation algorithms) are also welcome to apply.

The position is initially for 1 year and may be extended by mutual agreement, subject to the availability of funds.

For a formal job description and how to apply, please see <http://www.mdx.ac.uk/about-us/work-for-us/job-vacancies>

Applicants are encouraged to include the following material in their application:

(i) a letter of intent, (ii) a CV with a list of publications, (iii) a research statement, and (iv) contacts of at least two references.

General inquires about the position, the project and the application process can be directed to Panos Giannopoulos (p.giannopoulos@mdx.ac.uk).

Closing Date: 4th August 2016
Interview Date: TBC
